PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years building and leading an ERP/CRM SaaS in production. I lead a team of 3 developers and work end to end, from requirements to deployment, with JavaScript, Node.js, Express, React, PHP and MySQL; TypeScript and Python in my own projects. My AI and API integrations save 10 to 20 hours of manual work per week.

WORK EXPERIENCE

Technical Lead / Full Stack Developer | RO Medical | 09/2024 – Present

PHP, MySQL, JavaScript, Node.js, Express, React Native, AWS, GitHub Actions

- Lead a team of 3 developers on the internal ERP/CRM SaaS used by 50 people (sales, invoicing, HR, inventory, marketing and mobile app): technical roadmap, code reviews and backlog prioritization.
- Automated invoice processing and other data entry with the OpenAI API, and synced prices and stock between Shopify and the CRM, removing 10 to 20 hours of manual work per week.
- Built the Node.js and Express API used by the company chatbot and mobile app, and the mobile app in React Native.
- Implemented facial recognition clock-in with Amazon Rekognition, improving attendance tracking and HR metrics.

Full Stack Developer | RO Medical | 07/2023 – 09/2024

- Built frontend and backend features for the internal management system with PHP, MySQL, JavaScript, jQuery and AJAX.
- Optimized SQL queries, performance and stability; resolved production incidents and took part in deployments.

Freelance Full Stack Developer | Paying clients | 06/2024 – Present

- Dacar (Node.js, Express, React, MongoDB): management and quoting system in production used by 5 people; cut quote preparation from several hours to 30 minutes at most.
- Logistran (Laravel, MySQL): ERP-style admin system for a logistics company with invoices, payments, customer accounts, route sheets and vehicle due dates.
- Volquetes Buenos Aires (Next.js, Vercel, GA4): lead generation website focused on performance, technical SEO and conversion tracking.
- Latam Financial Group (PHP, WordPress, Moodle, WooCommerce, Nginx): e-learning platform with LMS, e-commerce and payments (07/2025 – 12/2025).

Community Manager & E-commerce Support | Globos Tuky (Derpol SRL) | 03/2017 – 06/2023

PROJECTS

Datto: Founder & Full Stack Developer | Own product in development | 07/2026 – Present

Python, FastAPI, PostgreSQL, pgvector, OpenAI API, React, TypeScript, Docker

- Multi-tenant platform to query business data in natural language: RAG, safe read-only SQL generation and execution, JWT, roles and auditing.
